

Igor Dolgalev

EDUCATION

Master of Science: Biotechnology and Entrepreneurship 2014
New York University, New York, NY.

Bachelor of Arts: Biological Sciences (Computational Biology Concentration) 2005
Cornell University, Ithaca, NY.

TECHNICAL SKILLS

Programming: Bash, Java, MATLAB, Perl, PHP, Python, R
Databases: Microsoft Access, MongoDB, MySQL, PostgreSQL
NGS data analysis: ABYSS, ANNOVAR, bedtools, Bismark, Bowtie, BWA, Canu, CASAVA/bcl2fastq, Control-FREEC, CREST, DELLY, DESeq, DEXSeq, DiffBind, FusionCatcher, GATK, LoFreq, MACS, methylKit, MuTect, Picard, poretools, QIIME, rMATS, RSEM, samtools, SOAPdenovo, SomaticSniper, SPAdes, STAR, TopHat/Cufflinks, Velvet

PROFESSIONAL EXPERIENCE

NYU Langone Medical Center, New York, NY. 6/2013 - present

Senior Bioinformatics Programmer, Genome Technology Center and Applied Bioinformatics Center
Provided bioinformatics support related to Illumina MiSeq/HiSeq next-generation sequencing as well as gene expression microarray and NanoString nCounter technologies. Responsible for monitoring and managing projects, identifying and resolving problems that may impact the project results, maintaining research software and hardware, and working with departmental leadership on developing and implementing data management policies. Created and operated the pipelines for processing DNA-Seq (somatic and germline SNVs, indels, structural variants, de novo assembly), RNA-Seq (differential expression, alternative splicing, gene fusions), and ChIP-Seq (peak calling, differential binding) data. Trained new bioinformaticians. Assisted GTC users with interpreting the results and performed custom additional analysis to address specific project needs.

Memorial Sloan Kettering Cancer Center, New York, NY. 10/2007 - 6/2013

Bioinformatics Engineer III, Geoffrey Beene Translational Oncology Core Facility
Senior Bioinformatician, Geoffrey Beene Translational Oncology Core Facility
Bioinformatician Technician, Geoffrey Beene Translational Oncology Core Facility
Provided bioinformatics support relating to the genomics-based approaches utilized by the core, primarily for high-throughput PCR, Sanger and next-generation sequencing (Illumina MiSeq/HiSeq), and mutation detection. Participated in the establishment, management, and maintenance of the relational database for projects, sequencing quality data, biological samples, primers, mutations, and other data. Performed quality analysis of the generated sequencing data and developed solutions for enhancing future performance. Operated the pipeline for genomic data processing, variant detection, and genomic consequence calculation. Also directly and indirectly assisted the core users in analyzing biomedical data and addressing scientific problems with computational techniques and tools.

Weill Cornell Medical College, New York, NY. 9/2005 - 9/2007

Research Technician II, Laboratory of Dr. Ronald Crystal, Dept. of Genetic Medicine
Research Technician I, Laboratory of Dr. Ronald Crystal, Dept. of Genetic Medicine
Worked on uncovering the genetic basis of various pulmonary disorders. My primary responsibility was analysis of gene expression microarray data using established methods as well as investigation of additional analytical tools. The process entailed sample management, array image quality assessment, statistical analysis of the expression data, and annotation retrieval from biological databases. Also involved in training other researchers on the use of analysis software, working with genotyping/SNP data, and performing real-time RT-PCR.
